

# Fernando Miguel Nishio Lucar

Field Biologist — Environmental Field Operations — Conservation Projects

Lima, Peru · +51 999 156 493 · FNishio@gmail.com

## Professional Profile

---

Environmental scientist and field biologist with more than 15 years of experience coordinating wildlife research, conservation projects, environmental monitoring, and field operations across Peru's coastal, Amazonian, and urban ecosystems.

Experience managing multidisciplinary teams, research logistics, protected area operations, community-based environmental initiatives, and scientific fieldwork in remote and high-complexity environments. Background includes marine wildlife conservation, water quality management, research station operations, and applied environmental problem solving.

Currently developing independent projects at the intersection of conservation, water systems, and technology.

## Core Skills

---

- Wildlife Field Operations
- Conservation & Environmental Projects
- Research Logistics & Field Coordination
- Marine & Tropical Ecosystems
- Environmental Monitoring
- Water Quality Management
- Team Leadership & Operations Coordination
- Community-Based Environmental Work
- Scientific Outreach & Education
- GIS & Environmental Data Analysis

## Selected Achievements

---

- Led multidisciplinary environmental research and conservation teams involving more than 80 researchers and volunteers.
- Coordinated field logistics and scientific operations across protected coastal and Amazonian ecosystems in Peru.
- Coordinated operational logistics for the construction of a long-term ecological research station within a protected natural area.
- Developed collaborations with NGOs, universities, zoological institutions, and conservation organizations.
- Improved procurement systems, operational workflows, and field logistics for remote scientific operations.

## Professional Experience

---

### **Project Manager — Museo Interactivo S.A.C.** 2024

- Coordinated administrative operations, logistics, and science outreach projects.
- Developed educational content related to geology, environmental sciences, and human anatomy.
- Managed interdisciplinary teams for environmental education and scientific communication activities.

### **Researcher — Aynimundo** 2023

- Secured funding for a pilot greywater treatment system project.
- Designed and implemented a compact urban irrigation and food production system focused on sustainability.
- Achieved the production of more than 120 kg of food within six months.

### **Director — Center for Environmental Sustainability (UPCH)** 2019–2022

- Directed scientific coordination and field operations across multiple environmental research projects.
- Supervised multidisciplinary teams involving researchers, volunteers, and institutional collaborators.
- Coordinated fundraising initiatives and institutional partnerships.
- Led operational coordination for the construction of a scientific research station within a protected natural area.

### **Operations Manager — Punta San Juan Program (UPCH)** 2018–2021

- Directed field logistics and operational coordination across Lima, Nazca, and protected coastal ecosystems.
- Coordinated procurement systems, equipment acquisition, transportation, and operational planning for remote fieldwork.
- Supported wildlife conservation and marine research operations involving marine mammals and seabirds.

## Wildlife Research Experience

---

- Marine mammal capture, tagging, health assessment, and population monitoring
- South American fur seal reproductive monitoring (2012–2021)
- South American sea lion health assessment (2012–2020)
- Seabird conservation and ecological monitoring programs
- Humboldt penguin population monitoring (2005–2007)
- GPS capture and tagging of Amazon river dolphins (2018)
- White-lipped peccary assessment in Manu Reserve (2006)
- Herpetological inventory in Manu Reserve (2006)

## **Environmental Education & Community Projects**

---

- Designed and led environmental education and community outreach initiatives focused on conservation, climate change, water quality, and public health.
- Conducted workshops and community-based environmental training programs in peri-urban and rural communities around Lima.
- Participated in household water treatment and water quality monitoring projects using coliform testing systems and ceramic filtration technologies.

## **Education**

---

### **Bachelor's Degree in Biology (Environmental Microbiology)**

Universidad Peruana Cayetano Heredia (UPCH)

## **Certifications & Additional Training**

---

- Water Quality Management Technician — Shizuoka Prefecture, Japan
- Wastewater Treatment Programs — PUCP-INTEC
- Environmental Impact Assessment — PUCP-INTEC
- Google Project Management Certification (In Progress)
- R Programming for Statistical Analysis — UNAM

## **Technical Skills**

---

QGIS · GIS Applications · Power BI · R Programming · Scientific Reporting · Environmental Data Analysis

## **Languages**

---

- Spanish — Native Proficiency
- English — Professional Working Proficiency
- Japanese — Conversational Proficiency
